1. The first group of people who are interested in the study of the history of the world are the historians. They are the people who study the past and write about it. They are the people who tell us what happened and why it happened. They are the people who help us to understand the world and ourselves.

Abstract—The purpose of this study was to determine if there were differences in the prevalence of musculoskeletal disorders between two groups of nurses working in different departments of a hospital. The subjects included all registered nurses employed by a large tertiary care hospital in Ontario, Canada. A questionnaire was mailed to each nurse asking about demographic information, work history, and symptoms of musculoskeletal disorders. The prevalence of musculoskeletal disorders was significantly higher among nurses working in the intensive care unit than among those working in the medical-surgical department.
